# John Deere 435

From Wikipedia, the free encyclopedia

The **John Deere 435** is a [tractor](#) that was built for two years, 1959 and 1960. Prior to 1960, [John Deere](#) only produced tractors that had [two-cylinder engines](#). The John Deere 435 was the only model that had a [General Motors](#) two-cylinder two-cycle engine, in the manner similar to their heavy truck engines of that era. This engine and the two cycle truck engines were all equipped with a positive displacement supercharger. There were a total of 4,626 John Deere 435 units built.

The John Deere 435 had some options that it could come with. The **front axle** of the tractor had a sway-back front end for some of the models. After 1960, the option was given to have **power steering** rather than mechanical steering.<sup>[1]</sup>
